Press Release

CEMC will now be partnering with Electro-Mechanical Recertifiers, Inc. to provide recovery, testing and repair of medical equipment.

Our Specialties Include

- ◇ Cardiology
- ◇ Physiological Monitoring
- ◇ Physical Therapy
- ◇ Surgical Equipment
- ◇ Respiratory Therapy
- ◇ Laboratory
- ◇ Radiology
- ◇ General office

CEMC is fully-insured and has performed regularly scheduled PMs & ES testing on thousands of medical devices at licensed acute care facilities since our incorporation in 1996.

Medical Equipment Repairs

Our technicians are trained and experienced in servicing a large variety of medical equipment makes and modalities. Troubleshooting and repairs can be performed either onsite or at our shop depending the severity or nature of the problem.

Electrical Safety Testing (ES)

Electrical Safety is important to ensure that your medical device poses no fire, shock, or overall safety hazard to the patient. Testing is done for current leakage and equipment inspected for conductive materials or chemicals that may come in contact with an electrical device.

- ES testing should be completed at least once annually.
- As with PM, ES testing is performed by a technician qualified to current standards that meet those of the AAMI, UL-544 and NFPA-99.

Parts

The CEMC Strategic Sourcing Department researches manufactures and maintains supplier relationships to offer you the best replacement parts and the lowest prices.

'It is company policy that all service recommendations and repairs be both justified and explained clearly to our clients.'
