Disaster Restoration Services:

Commercial, Industrial and Institutional Consulting for Emergency Services. Recovery and Restoration Measures from Natural Disasters and Manmade Events. Pre-Loss Risk Analysis Assessments, and Post-Loss Investigations as well as Root Cause Analysis of Equipment Failure for Boiler & Machinery Loss. Offering Electronic Disaster Response and Recovery Planning Tools.

- Lead, Mold and Asbestos Remediation
- Temporary Power - Work around power solutions, generators and power distribution cables and panels
- Climate & Air Quality Controls - Temp AC and heat and HEPA air-scrubbing of airborne contamination
- Dewatering - Muck out, water removal, extraction, dehumidification
- Biohazard Cleanup - Industrial accidents, criminal and terrorism events
- Board Up - Provide containment zones of damaged areas, vehicle collisions, glass breakage and secure prior to/after vandalism events
- Roof Tarping - Storm and wind events
- Temporary Site Control - Secure access fencing, security guard and site monitors for numerous physical and environmental hazards
- Shoring and Stabilization - Collapse from structural failure due to design deficiencies, crane collapse overloading, wind events, etc.
- Environmental audits and healthy building surveys
- Environmental - Leaching capture, stabilization and containment services. Frac trailer, holding sampling, profiling and disposal options
- Infection Control Measures – Healthcare containment, temporary negative pressure rooms, UVC, AHP & VHP disinfection
- Clean construction methods to avoid cross contamination of critical atmospheres and clean room environments
- Incident management and project management team resources
- IT, electronics and sensitive equipment preservation. Mitigation and OEM level evaluation services and recertification options
- Equipment decommissioning, mothballing and corrosion control, waste streaming and scrapping
- Equipment installation setup and commissioning
- Data preservation and recovery from crashed hard drives and locked out programs
- Artwork preservation, mitigation and various restoration and conservation options of valuable papers, book and document preservation as well as a myriad of reproduction service options
- Our expertise:
 - Electrical Engineers and Consultants
 - Mechanical and Process Engineers
 - Environmental Engineers
 - Equipment Experts
 - Welding
 - Electrical Gear and Power Dist.
 - Industrial and Construction
 - Accident Investigations
 - Project Management Teams
- ER LLC can assist as an Owners Rep to expedite special projects and restoration projects
